EDUCATION

2024-2028

GNA University, Phagwara, Punjab
Bachelor of Technology in Computer Science (AI & ML)
CGPA: 9.43

EXPERIENCE

May 2026-June 2026

Contributor – GirlScript Summer Of Code (GSSoC)

- Successfully contributed and merged PRs in open-source repositories during GSSoC.
- Collaborated with developers worldwide, gaining practical open-source development experience.
- Developed ML and DL projects involving data preprocessing, training, and evaluation of models.
- Strengthened expertise in Git/GitHub, teamwork, and software development workflows.

PROJECTS

RAG based AI-Assistant | Python, LangChain, ChromaDB, Hugging Face, Streamlit, Mistral AI | [Github](#)

- Developed an end-to-end Retrieval-Augmented Generation (RAG) assistant leveraging LangChain, ChromaDB, and Mistral AI to deliver context-aware and accurate question-answering capabilities.
- Engineered a document processing pipeline incorporating PDF ingestion, text chunking, embedding generation, and semantic retrieval for efficient information extraction.
- Built an interactive Streamlit interface integrating Hugging Face embeddings and vector databases to generate accurate responses while reducing hallucinations.

Movie Recommendation System (Deployed) | Python, Scikit-learn, Pandas, Streamlit, TF-IDF | [Github](#)

- Developed and deployed a scalable **Movie Recommendation System** that provides personalized recommendations using TF-IDF vectorization and cosine similarity.
- Engineered a machine learning pipeline for feature extraction, data preprocessing, and similarity computation on movie metadata.
- Built and deployed an interactive Streamlit application for real-time movie discovery and recommendation generation.

House Price Prediction using Machine Learning | Python, Pandas, Scikit-learn, NumPy, Matplotlib | [Github](#)

- Developed a predictive machine learning model for estimating house prices using regression techniques and housing data analysis.
- Engineered features, handled missing values, and optimized model performance through preprocessing and evaluation metrics.
- Leveraged Scikit-learn to train and test models, enabling accurate and reliable real estate price predictions.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL

Libraries/Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Flask, LangChain, Hugging Face, NLTK

AI/ML: Machine Learning, Deep Learning, Natural Language Processing (NLP), Large Language Models (LLMs), Retrieval-Augmented Generation (RAG) .

Databases: MySQL, ChromaDB

Tools: Git, GitHub, VS Code, Jupyter Notebook, Streamlit

Course Work: Data Structures & Algorithms, DBMS, Operating Systems, OOPS.

ACHIEVEMENTS AND LEADERSHIP

- Qualified for the National Level **Smart India Hackathon (SIH)** after clearing university-level selection rounds.
- Reached the Final Round of the **GNA University Hackathon** by designing and presenting an innovative technical solution.
- Actively participated in **10+ hackathons**, gaining hands-on experience in AI/ML, software development, teamwork, and problem-solving under tight deadlines.
